EDUCATION

Institute of Technology and Management — **Bachelor of Technology in Information Technology** Nov 2022 – June 2026 | Gwalior, India

TECHNICAL SKILLS

Languages: Java (JDK 17), SQL, JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: Spring Boot, Spring Data JPA, Hibernate, Spring Security, React.js, Thymeleaf

Databases & Tools: MySQL, Git, GitHub, Maven, Postman, RESTful APIs

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), MVC Architecture, REST API Design

Problem Solving: LeetCode (200+ Solved), GeeksforGeeks (100+ Solved)

TECHNICAL PROJECTS

Real-Time Chat Application | *Java 17, Spring Boot, WebSockets, STOMP, SockJS, Thymeleaf, Maven* Dec 2023 – Jan 2024

- Architected a full-duplex real-time communication service utilizing Spring WebSocket with STOMP protocol for publish-subscribe messaging.
- Configured SockJS fallback options on WebSocket endpoints (/chat) to maintain persistent client connectivity across restrictive network proxies.
- Leveraged Spring's built-in simple message broker (/topic) and application destination mapping (/app) for low-latency message delivery to connected subscribers.

Student Management System | *Spring Boot, JPA/Hibernate, MySQL, Spring Security, Thymeleaf* Oct 2023 – Nov 2023

- Engineered a full-stack academic administration system featuring role-based access control (RBAC) via Spring Security to segregate student and administrator privileges.
- Mapped normalized relational entity schemas (One-to-Many, Many-to-Many) using JPA/Hibernate to maintain data integrity and streamline relationship queries.
- Optimized relational database performance through composite indexing and query refactoring in MySQL, significantly reducing lookup and retrieval times on student records.

Online Voting Poll System | *Java, Spring Boot, MySQL, Spring Data JPA, RESTful APIs* Aug 2023 – Sep 2023

- Engineered a stateless RESTful voting service using Spring Boot and Spring Data JPA to manage dynamic poll lifecycles, option retrieval, and real-time ballot tallies.
- Designed relational data models utilizing JPA @ElementCollection mappings to maintain dynamic vote options and counts while preserving data consistency.
- Implemented decoupled REST API endpoints for poll creation, ID-based lookups, and voting actions, enabling cross-origin integration via configured CORS policies.

CERTIFICATIONS & ACHIEVEMENTS

Programming Using Java — Infosys Springboard March 2023

Data Structures and Algorithms in Java — Infosys Springboard March 2023

Competitive Coding Milestones — Solved 200+ problems on LeetCode and 100+ problems on GeeksforGeeks Active
